

UX

# MEET THE FREE-SPIRITED URBAN CROSSOVER

Breaking from the norm with an interior inspired by traditional Japanese architecture combined with the widest field of vision in its class, and a bold yet playful and eye-catching exterior design, the Lexus UX offers a seamless continuity of experience from inside out. Enjoy new adventures. Discover new places. Let the UX take you there.

- Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in Brunei. Addition of extra features may also change figures.

# DO MORE. BE MORE.

Boldly crafted, the Lexus UX is captivating yet playful, simple yet functional, integrating performance and dynamism with innovations in comfort and security.

DESIGN AND FUNCTIONALITY  
FOR EVERYDAY LIFE

- Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in Brunei.  
Addition of extra features may also change figures.

# EXTERIOR

## 01 / Spindle Grille Expression

The three-dimensional block-shape mesh pattern changes depending on the viewing angle, exuding dynamism and epitomising Takumi craftsmanship.

## 02 / Triple LED Headlights

Compact triple-projector LED units and L-shaped Daytime Running Lights proudly display a Lexus signature arrowhead. These multi-weather lights maintain a good field of view even in foggy driving conditions.

## 03 / Standard Roof

Roof rails made from solid aluminium create an appealing shape that runs smoothly and seamlessly along the UX roofline.

## 04 / Alloy Wheel

Complementing the exterior design for the urban explorer, the UX Premium grade features 17" alloy wheels, while the F Sport grades have 18" alloys with run flat tyres.

## 05 / Rear Combination Lamps

The bold design of the rear combination lamps reinforces the UX's unique identity. The left and right lamps are connected by the aero stabilizing blade lights to form a single line of light across the rear, illuminated by 120 LEDs. This form is complemented by the advanced aerodynamics of the L-shaped race car-inspired fins, which contribute to excellent rear stability while cornering and in side winds.

# INTERIOR

## DRIVER-INSPIRED COCKPIT

Crafted to anticipate your every need, every aspect of the interior was designed with the driver in mind. As you settle into the bolstered driver's seat, you'll notice controls that are intuitively positioned toward you—with an enhanced Remote Touchpad and audio switches ergonomically located in the palm rest. Even the dash is thoughtfully designed. Inspired by the Japanese architectural concept of marrying the inside with the outside, known as 'engawa', it appears to flow seamlessly into the hood. The result: among the widest field of vision in its class and optimal visibility of the road ahead.

### Sashiko Leather Quilting

The smooth leather upholstery available for the UX is inspired by 'sashiko', a traditional Japanese quilting technique that is also used in the making of judo and kendo martial arts uniforms. The quilted leather is decorated with new perforation patterns that form mathematical curves and gradations in perfect alignment, enhancing the appearance of the seats.

# INTERIOR

## A NEW PERSPECTIVE ON CROSSOVER TECHNOLOGY

The UX is designed to empower you in your everyday life. Every Lexus comes with a wealth of innovative technology, and the UX is no exception. The Panoramic View Monitor\* combines the images from four video cameras to give you an amazing 360° birds-eye view of the car and its surroundings for more precise manoeuvring. Stability at speed and in cross winds is enhanced by unique aerodynamic stabilisers, subtly incorporated into the design of the wheel arches and rear lights. Now you can command any bump or turn in the road, and whatever life springs at you.

### Innovative Technology

The multimedia unit features a 10.3" screen displaying Satellite Navigation. Other features for your convenience include four USB ports and voice recognition. Wireless charging is also available on Premium and F Sport grades.

\* Only available for F Sport

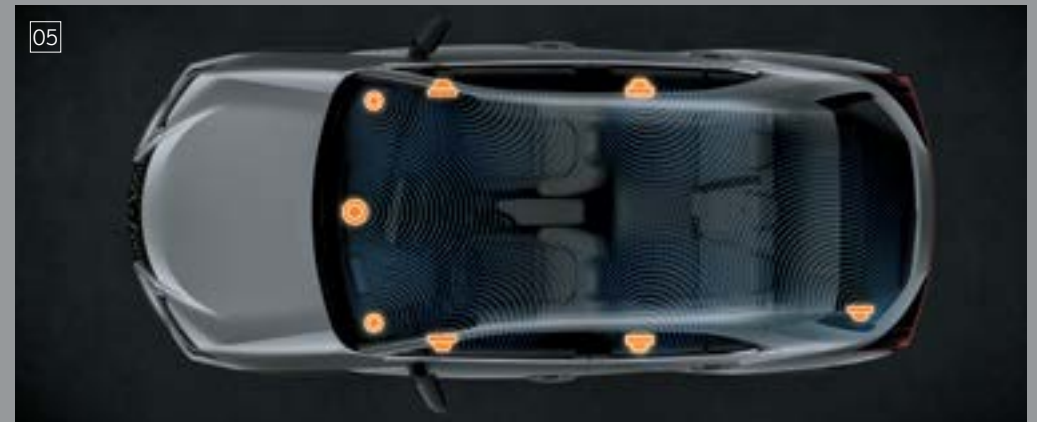

# FEATURES

## 01 / Meters/EMV display

The 10.3-inch EMV displays incoming calls and audio system, and coordinates the display of select information with the multi-information display in the 7-inch color TFT Optitron meter. The drive mode select switch is located on the meter hood bezel.

## 02 / Wireless Charger

This thoughtful charging tray in the center console enables wireless charging of batteries in Qi-compatible smartphones and electronic devices simply by placing them on the charger tray.

## 03 / Remote Touch Interface

The interface is designed for smartphone-style operation. A smooth touch pad surface allows the finger to easily slide over, while the cursor can be adjusted to suit the user's preferences. Pinch-in and pinch-out operation enables continuous in and out zooming.

## 04 / Panoramic View Monitor

Multimedia comes with navigation system and panoramic view, which displays a composite image comprising of images from the cameras, showing the vehicle as if viewed from above to support the driver when driving at slow speeds.

\* Only available for F Sport

## 05 / 8 Speakers Surround Sound System

The 8-speaker system use bamboo charcoal speaker diaphragms to reduce mass and deliver natural-sounding voices and improved mid-range sound. The 8-speaker system adds a centre-dash tweeter, a subwoofer mounted in the luggage area and a more powerful amplifier.

#### 06 / Hands Free Power Back Door

Even if both hands are full, when carrying the Electronic Key you can open and close the back door automatically by moving your foot under the rear bumper and out again.

#### 07 / Lexus Climate Concierge

It automatically controls the cabin temperature, including individual temperature controls and the Ventilated Seats\* for the front seats to optimize the comfort of each occupant. It also provides one-touch control of all heating systems in the cabin.

\* Only available for F Sport

#### 08 / Usb Ports/Mini-Jack/Power Outlet

Two USB ports and a mini-jack integrated inside the center console box support the plug-and-play use of music players, and enable the connection and charging of various devices and portable gear. Additional power outlets are two USB ports in the rear of the center console.

#### 09 / Luggage Space

Supporting an active lifestyle, the ample luggage space highlights the practical convenience of the packaging and thoughtful design. For longer items and larger loads, the 60/40 split rear seatbacks fold down to create various passenger and luggage configurations.

#### 10 / Rear Armrest

A thoughtful strap makes it easy to fold out the armrest in the center of the rear seats to provide added comfort and support. It also holds two convenient cupholders integrated in front.

A dynamic expression of the Lexus performance philosophy, the advanced platform, low centre-of-gravity and advanced aerodynamics all come together for a more refined and stable ride.

# PERFORMANCE

## 01 / Engine

The advanced 2.0-liter inline 4-cylinder engine generates a sophisticated blend of performance with fuel efficiency and environmental friendliness. Its basic design was refined to boost thermal efficiency and power output while reducing weight and size.

## 02 / Direct Shift-CVT

The UX delivers the smooth and fuel-efficient driving of a conventional CVT, with a direct and strong launch acceleration feel using an additional launch gear. In conjunction with drive mode control, it realizes responsive performance to suit various driving styles.

## 03 / EPS (Electric Power Steering)

Featuring a compact and highly rigid format, the column assist-type EPS delivers the sharp response expected of a Lexus. Adopting a large column shaft enhanced torsional rigidity, boosting both steering response and easy operation, contributing to responsive handling that instantly and crisply responds to driver inputs with a smooth and sure steering feel.

## 04 / Drive Mode Select

It provides integrated control of multiple systems between three modes: Eco for fuel efficient driving; Normal for balanced driving performance with fuel efficiency; and Sport for sporty driving with enhanced steering feel and acceleration response.

## 05 / Suspension

The MacPherson strut front suspension and double-wishbone rear suspension deliver excellent steering response together with premium ride comfort. They were fine-tuned specifically for the UX in keeping with the 'clear and deep feel' performance philosophy.

## 06 / Aerodynamics

The UX Premium drove developments in aerodynamics like the aero stabilizing arch moldings, and aero stabilizing blade lights with integrated rear combination lamps. The aero ventilating wheels realize a high level of both aerodynamic and brake cooling performance.

# INTRODUCTION

## F SPORT

F SPORT evolves the Lexus sport DNA that finds its ultimate expression in the LFA supercar, to enable more drivers to experience its exciting performance and unique personality. The integration of exclusive F SPORT refinements and sports tuning give drivers a feeling of unity with the road, as well as the thrill of sports driving.

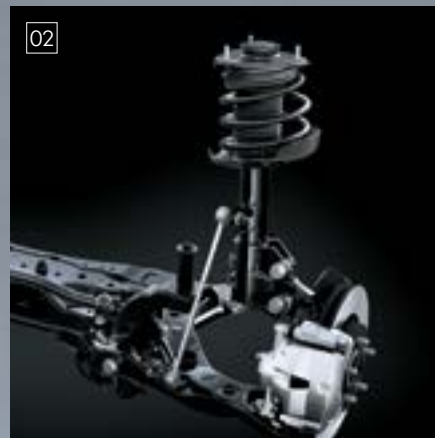

Building on the secure powerful presence of the UX, the F SPORT pursues a low, wide form that evokes sports performance at a glance. It integrates exclusive F SPORT design features that include the mesh radiator grille, front and rear lower bumper garnish, 18-inch aluminum wheels and select exterior colors. The sporty feeling is amplified in the driver's cockpit with its exclusive sports seats, TFT meters, clock, steering wheel with paddle shifters, shift knob and pedals, and realized in the exhilarating performance of the specially-tuned suspension, AVS, performance dampers and Active Sound Control.

#### 01 / F Sport Front Seats

The exclusive sports seats evoke a sharp design while an 'integrated foaming' structure contributes to the excellent fit and holding performance. They combine outstanding comfort with excellent support for the body during sports driving.

#### 02 / AVS (Adaptive Variable Suspension System)

AVS optimally controls the damping force of the shock absorbers on all four wheels in response to driver input and road surface conditions, contributing to excellent ride comfort and handling.

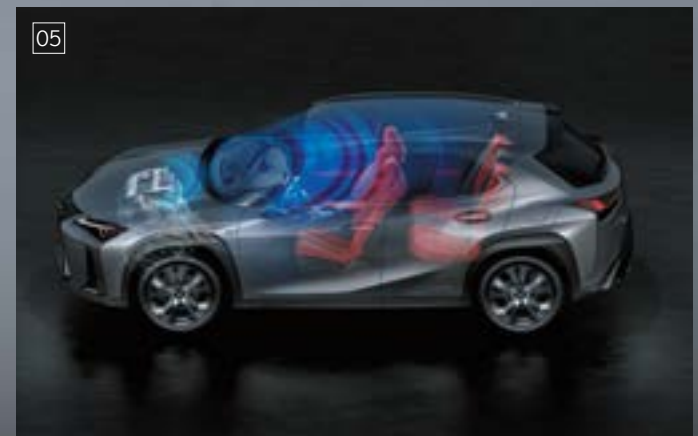

#### 03 / Performance Dampers

They quickly absorb body flex and vibrations from the road. Together with the front performance rod, they enhance straight line driving stability for outstanding comfort in normal driving, and dynamic performance in high-speed driving.

#### 04 / F Sport Meter

Evolved from the LFA supercar, the advanced interface of the F SPORT's sliding meter ring uses motion graphics that combine beautiful design with excellent visibility to display a range of functions that instantly communicate important information according to its priority.

#### 05 / ASC (Active Sound Control)

ASC enhances the engine sound, recreating upshifting and downshifting sensations that evoke a geared automatic transmission to provide audible feedback of the vehicle's response to driver operation.

The UX's elegant driving performance relies on active and passive safety measures that utilize advanced technologies for a deeper peace of mind. So you command the freedom to chase every horizon.

# SAFETY

## 01 / SRS (Supplemental Restraint System) Airbags

The front-passenger seat is designed to detect whether the seat is occupied by an adult or a child, or is vacant. In case the system detects a child or empty passenger seat, the system prevents the passenger's front, side and knee airbags from being deployed. The front passenger's airbag features two chambers, creating an indentation in the center impact area that helps to provide occupant protection in a severe frontal collision.

02

## 02 / Blind Spot Monitor

To make tasks like parallel parking even more convenient, the power-folding side mirrors automatically tilt down when the vehicle is placed in reverse. And, with built-in sensors that can detect headlamp glare from cars following behind, electrochromic functionality enables the mirrors to automatically dim to help keep glare out of the driver's eyes.

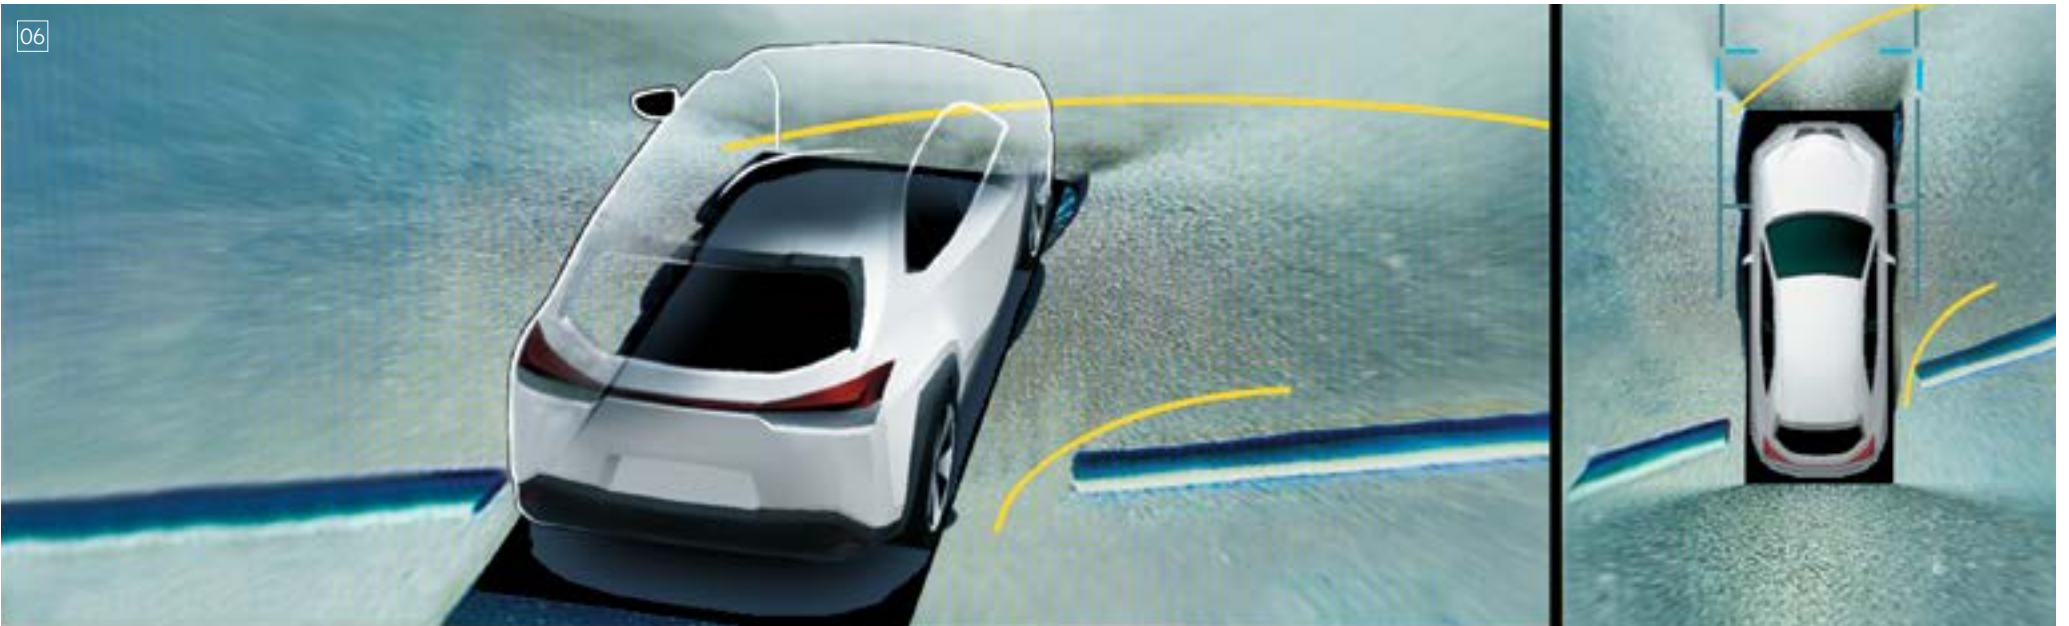

## 03 / Rigid Body Structure With Crumple Zones

Helping to dissipate the force of a collision, crumple zones in the front and rear are intentionally designed to compress at a controlled rate, helping protect occupants within the more rigid passenger compartment.

# SAFETY

## 04 / Intuitive Parking Assist

PKSA detects stationary objects such as walls in the direction of travel, as well as vehicles and pedestrians approaching from behind while reversing and alerts the driver on the display and with a buzzer in the event that a collision is determined to be likely.

## 05 / Blind Spot Monitor System

When the quasi-millimeter-wave radars in the rear bumper detect vehicles in adjacent lanes that aren't visible in the door mirrors, the system activates an LED warning indicator in the relevant door mirror the moment a vehicle enters this blind spot.

## 06 / Panoramic View Monitor

To help check areas surrounding the vehicle that are difficult to see from the driver's seat, the system shows a bird's-eye view of the vehicle in real time on the 10.3-inch EMV display, using a composite image taken by cameras mounted on the front, sides, and rear of the vehicle.

\* Only available for F Sport

“Our aim for the new UX was not to conform to the established crossover look, but to break with convention and create something more distinctive and dynamic.”  
- UX Chief Engineer Chika Kako
