LEXUS INTELLIGENCE SIX

The NX was developed around the core concept of 'Premium Urban Sports Gear', a next-generation Lexus that applies an urban focus to luxury SUVs. 'Premium Urban' aims to create refined solutions to the mobility demands of city living, offering advanced technologies, excellent environmental performance and refined Lexus features that provide outstanding quality and driving pleasure. 'Sports' expresses a dynamic and active attitude that shapes the aggressive and very individual styling, and injects a sporting edge into driving, with

sport-honed acceleration, control and handling. It is intrinsically linked with 'Gear', a meticulous focus on

refining every detail to offer the advanced functionality and effortless utility associated with the very best sports equipment, together with the eye-catching design and embrace of advanced technologies that set iconic 'Sports Gear' apart. The result is a game-changing, urban-focused SUV, with the acceleration, agility and handling to effortlessly negotiate city traffic, the utility to meet the ever-changing needs of an active and dynamic lifestyle, fuel efficiency that embodies environment-aware values, and the sophisticated features and refined detail that is a Lexus hallmark.

EXTERIOR

INTERIOR

Chassis

The foundation of the NX's responsive sporty handling is a lightweight, high rigidity body structure made from hot-stamp, high-tensile steel and aluminum, with strategically positioned reinforcements. The use of innovative production technologies including laser screw welding and body adhesives, together with extensive spot welding, enhances the rigidity of panel joints, and contributes to the excellent handling, refined comfort and quiet ride.

Pre-loaded differential

This innovative differential pre-loads torque under light loads or low rotational speed, contributing to highly-precise steering for excellent straight-line stability and acceleration performance.

Aerodynamics

The NX's superb aerodynamics contribute to fuel-efficient performance and quiet comfort in the cabin, even during high-speed driving. Careful attention paid to reducing drag, including an integrated rear spoiler, spats for all four wheels, and the engine, floor, lower arm and rear underbody covers, contributes to a smooth airflow.

Front and rear suspension

The compact and highly-rigid MacPherson strut front suspension and double wishbone rear suspension were optimized to deliver agile handling and luxurious ride comfort. A close focus on individual components included refining the coil springs, stabilizers, shock absorbers, and suspension bushings.

S-VSC (Steering-assisted Vehicle Stability Control)

VSC operates in conjunction with the EPS, ABS and TRC to limit and distribute drive power and assist steering torque to help stabilize vehicle behavior and direction, to provide excellent stability and control in various driving conditions.*

Drive mode select

Drive mode select provides integrated control of multiple systems to let you tune performance to suit your driving style. On vehicles equipped with AVS (Adaptive Variable Suspension system), you can select and change between Normal, Eco, Sport S and Sport S+ Modes. In addition, Customize Mode enables drivers to set their preferred settings for the powertrain, AVS, EPS (Electric Power Steering) and air conditioning.

Hybrid system

For dynamic driving and exceptional environmental performance, Lexus Hybrid Drive intelligently combines the power of a highly-efficient 2.5-liter gasoline engine with electric power from a high-output motor.

Adaptive Variable Suspension System (AVS)

Controlls damping forces in accordance with vehicle speedand helps achieve ride comfort at low speed, handling stability at high speed and also maintaining optimum vehicle attitude during cornering.

2.5-liter 4-cylinder engine

The compact and lightweight Atkinson Cycle engine with VVT-i delivers high performance together with excellent fuel efficiency, quiet operation and significantly reduced emissions.*1

E-Four (Electric four-wheel drive)

E-Four uses a rear motor that operates independently from the front motor to optimize distribution of front and rear drive force, delivering excellent vehicle stability in a wide range of driving situations.

The LED headlamps symbolize a sharp sporty performance, together with wide L-shaped LED rear combination lamps that seem to stand out from the back door, express an individuality that can't be hidden, even from a distance. In the cockpit, switches are laid out for easy operation to enable the driver to focus on driving.

3-eye Bi-Beam LED headlamps

The ultra-small 3-eye Bi-Beam LED headlamps combine advanced design with excellent light distribution. LEDs in the sequential turn signal lamps illuminate sequentially in a flow from the inner side to the outside of the vehicle.

LED rear combination lamps

The distinctive Lexus L-shaped lamps look like a brilliant crystal, even in daytime. The wide LED sequential turn signal lamps illuminate from the inner to the outer side of the lamp to intuitively convey the turn direction.

Door mirrors

Combining form with function, the sculptured door mirrors embody the strength and luxury of the exterior design, reduce wind noise through excellent aerodynamics, and provide an excellent field of view.

Panoramic roof

The panoramic roof with fixed glass allows ample light into the cabin, and provides a sense of comfort and openness enhancing the feeling of roominess inside the

Laminated glass with infrared ray absorbing film has been adopted, reducing the amount of solar radiation in the cabin ensuring a cooler cabin.

Hands-free power back door

Even if both hands are full, when carrying the Electronic Key you can open and close the back door automatically by moving your foot under the rear bumper.

Remote Touch Interface

Simple touchpad operation lets users interact intuitively with the navigation and audio systems on the 10.3-inch EMV display, providing easy control of the systems.

Color head-up display

The wide, color head-up display projects a range of frequently checked information on the lower windshield glass in the driver's line of sight, including the current speed, tachometer, audio system, and more.

Multimedia coordination function

This function coordinates the display of information from the multimedia systems on the 10.3-inch EMV (Electro Multi-Vision) display in the center of the instrument panel and the 4.2-inch color TFT (Thin Film Transistor) multi-information display in the meter cluster. For convenience, audio system information, incoming mobile calls, and some navigation on the EMV display can also be displayed on the multi-information display, and controlled using switches on the steering wheel.

Meters

The 4-dial meter combines a three-dimensional analog speedometer and tachometer with a digital multi-information display that changes between blue and red illumination to highlight the drive mode

Wireless charger

This thoughtful charging tray in the center console box enables wireless charging of batteries in Qicompatible smartphones and electronic devices simply by placing them on the charger tray.

Contrasting the athletic individuality of the stylish exterior, the ample capacity of the luggage space highlights the practical convenience of the packaging and smart design of the cabin. The back door opens wide to provide easy access to a flexible space that can accommodate different sizes and combinations of suitcases, while accommodating passengers in the rear seats.

Power folding rear seats

Enhancing versatility and convenience, the rear seats can be reclined at the touch of a button integrated into each rear seat. They can also be folded flat or upright using switches in the rear seats, luggage space and the driver's-side instrument panel.

Power back door

Convenient controls for the power door are set in the instrument panel and Electronic Key, as well as a closing switch in the bottom of the door. A memory function lets users set the opening clearance.

Mark Levinson audio system

The Mark Levinson Premium Surround Sound System features a compact 12-channel amplifier to drive 14 GreenEdge ultra-high efficiency speakers that generate outstanding output while significantly reducing energy consumption. A 5.1/7.1-channel surround system contributes to the high fidelity, concert hall-quality sound. The Auto Volume System automatically adjusts the audio system volume to complement the genre of each song as it is played.

USB ports/mini-jack/power outlets

Two USB ports and a mini-jack support plugand-play use of music players. Conveniently positioned power outlets in the center console box and luggage space enable the charging of various devices and portable gear.

Cupholders

The cupholders for the front seats can hold two drink bottles or a handled mug. The grip of the cupholder mats makes it easier to open a bottle lid with one hand.

Sunglasses holder

The sunglasses holder is conveniently located under the palm rest. The removable magnetic lid stores away in the center console box. A flocked surface inside the holder protects sunglasses against scratching.

LEXUS SAFETY SYSTEM

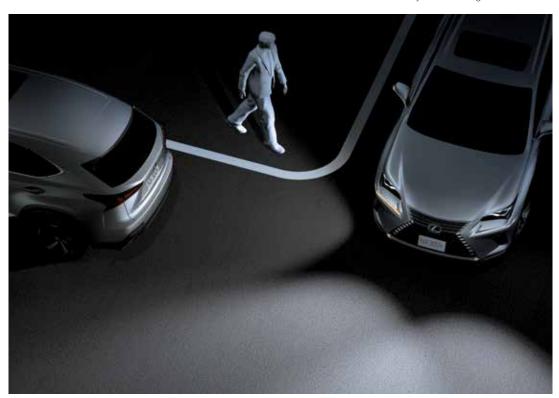

8 SRS airbags

The NX features dual-stage SRS airbags (Front seats), SRS knee airbag (Driver's seat), SRS cushion airbag (Front passenger's seat) that supports seatbelt restraint by lifting the front edge of the seat cushion during a frontal collision, SRS side airbags (Front seats), and

SRS curtain shield airbags (Front and rear door windows).*1

Wide-angle cornering lamps

Wide-angle cornering lamps provide additional illumination in the direction of travel, to the side and above, enhancing pedestrian visibility when turning at intersections.

Note: The system may not operate properly depending on the weather, road and vehicle conditions or other factors. Be sure to read the Owner's Manual carefully.

Vehicles pictured and specifications detailed in this catalog may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

42

^{*1} The SRS (Supplemental Restraint System) airbags are supplemental devices to be used with the seatbelts. The driver and all passengers in the vehicle must wear their seatbelts properly at all times. Never install a rear-facing CRS (Child Restraint System) on the front passenger's seat. For a forward-facing CRS, it is recommended you use it in the rear seats. Please do not use accessories for the seats which cover the parts where the SRS side airbags should inflate. Such accessories may prevent the SRS side airbags from activating correctly, causing serious injury (Lexus genuine seat covers are specifically designed for models equipped with the SRS side airbags. To find out about availability in your area, please inquire at your local dealer). The photo shows all the SRS side and curtain shield airbags only inflate on the side of the collision in an actual accident). For details on these and other important safety features, be sure to read the Owner's Manual carefully.

FSPORT multi-information display

The multi-information display heightens your driving experience by displaying a G sensor with steering angle, accelerator opening and brake hydraulic pressure bars, and a turbo boost meter with oil temperature and pressure gauges.

F SPORT meters

Expressing dynamic sports performance, the exclusive analog meters feature full-length illuminated needles, silver needle rings, and distinctive white scales that evolved from the Lexus LFA supercar.

F SPORT front seats

The front sports seats blend refined comfort with firm support and excellent holding performance for sports driving. An innovative 'integrated foaming' manufacturing process eliminates wrinkles and movement of the upholstery.
