lexusindia.co.in Lexus Owner's Desk, 24/7 1800 300 53987[1800 300 LEXUS]

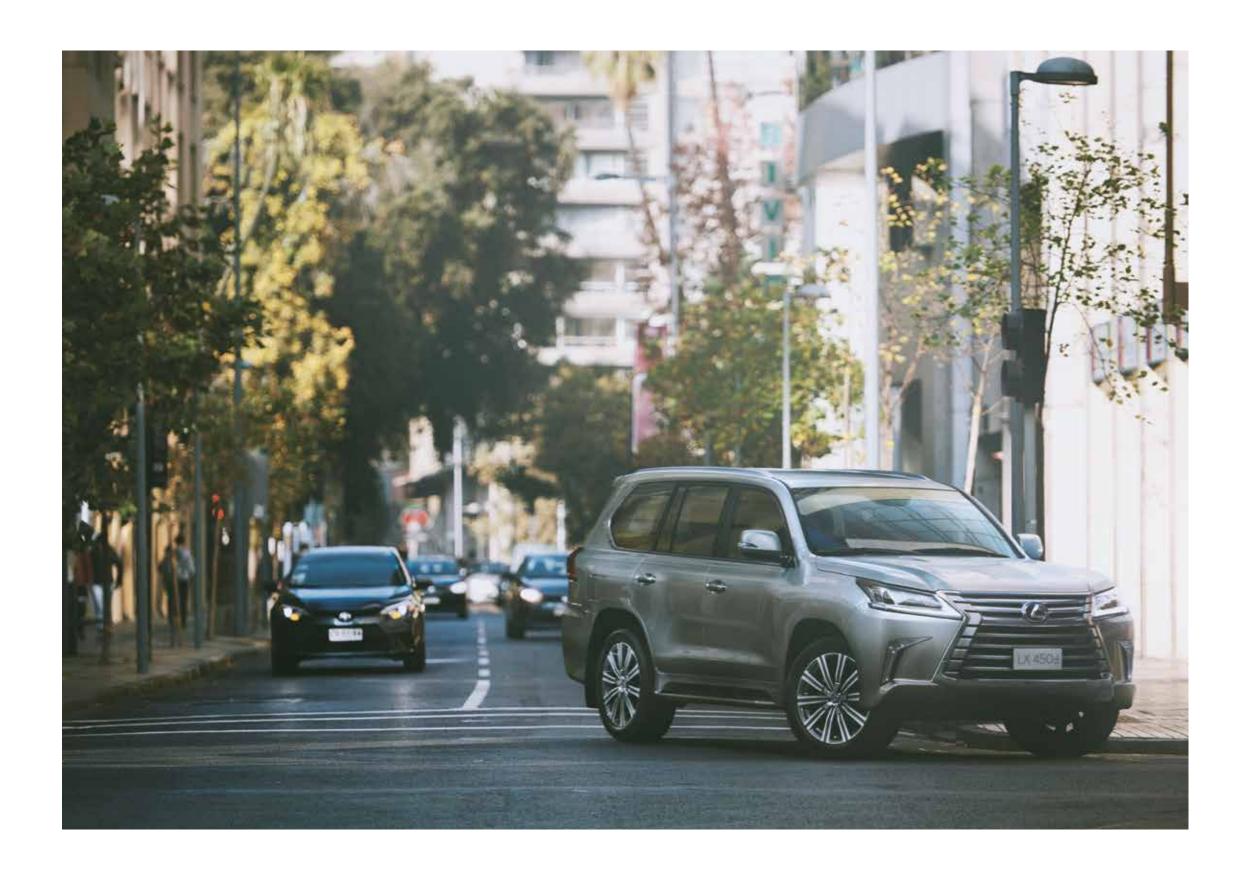

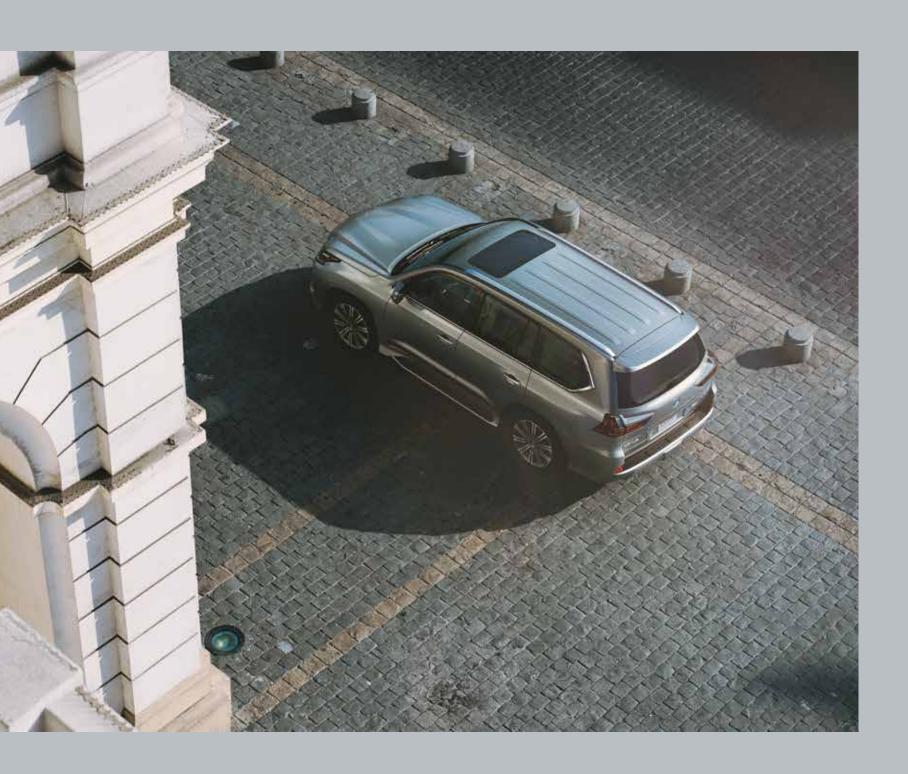

For a long time I thought my future and music lay in the city.

As long as I tried to fit in,

I believed I could create a new world.

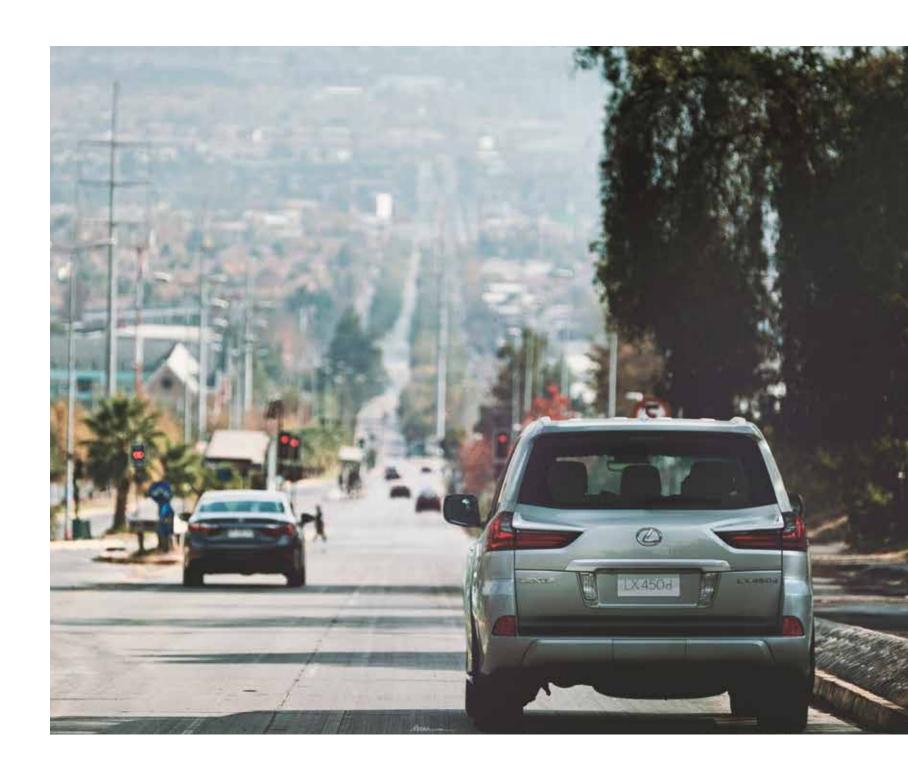

When I'm in the city,
I have all the instruments and equipment I need
to create sounds that are new to the world.
Yet somehow, something essential is missing.

I choose to travel to leave sensations behind, to empty myself, so I'm open to new sounds.

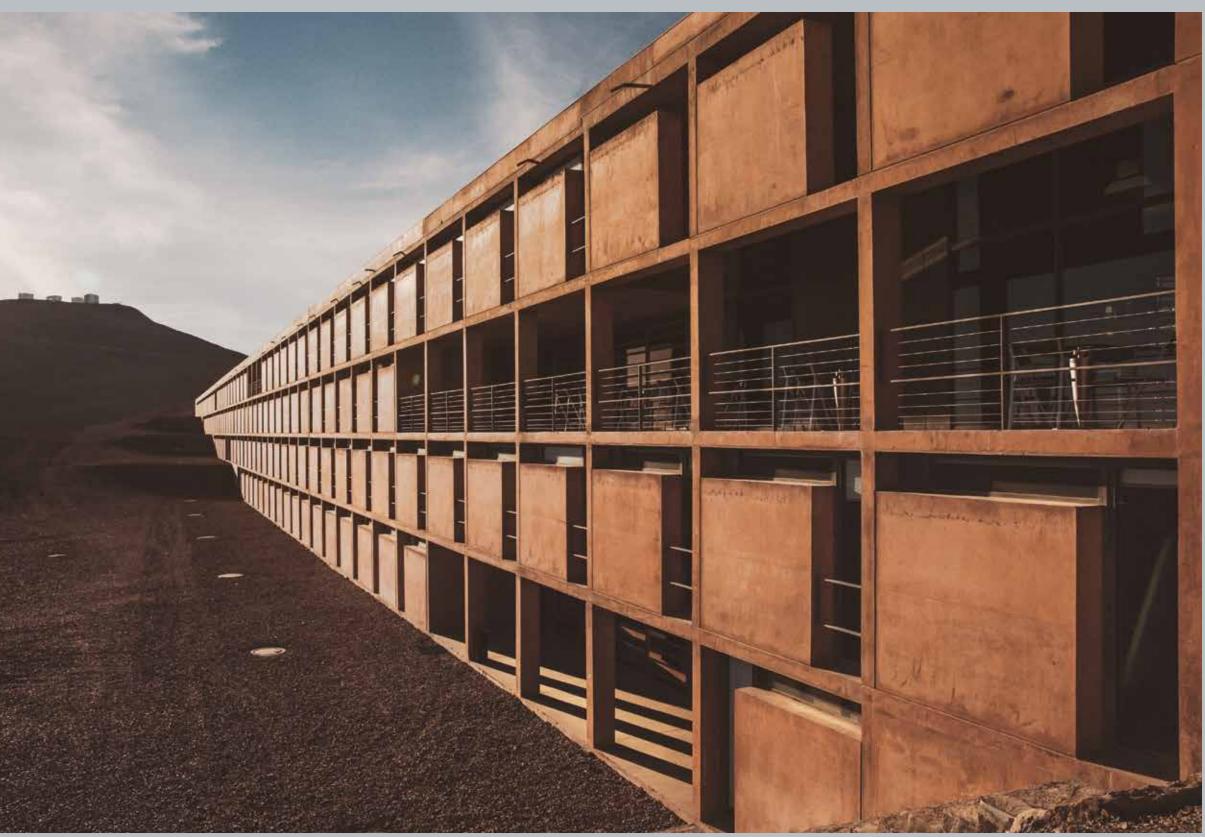

A musician I know said silence doesn't exist.
The beat of the heart. The whisper of air moving.
I can hear them here.
With time I forget the dissonance of the city.

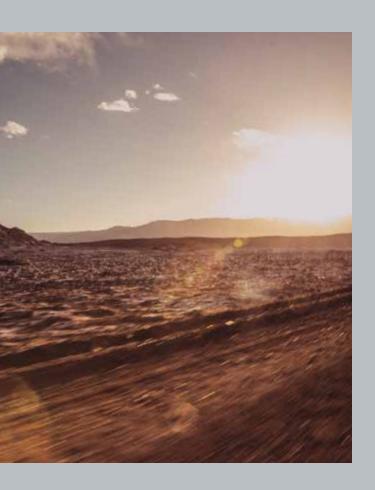

The loneliness of the city and the solitude of the wilderness are very different.

Loneliness doesn't inspire, nor does it make us stronger.

Some people feel relaxed listening to the flow and ebb of waves.

Others meditate to the sound of a vehicle running on a gravel road.

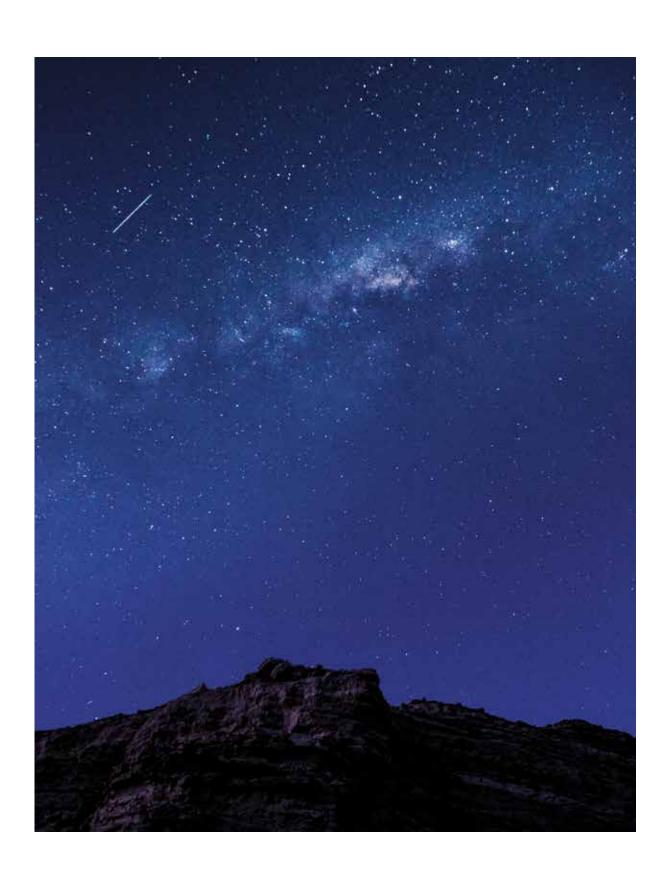

Silence is the melody the earth is playing.
The night sky sings along with it,
silent, twinkling and beautiful.

LX

LX CONCEPT

The flagship Lexus SUV fuses powerful goanywhere performance with the urban sophistication of peerless luxury.

A masterpiece that stands at the pinnacle catching styling, poised lively performance on of the Lexus SUV line-up, the LX fuses the the freeway and city streets, and the elegant powerful muscular performance and intelligent luxury of refined appointments. packaging worthy of an iconic flagship, with distinctive hallmarks of Lexus luxury.

dynamic presence of an authentic 4WD. Built to explore demanding terrain, the strength It exudes urban sophistication with its eye- driving pleasure on the road.

At the heart of this sophisticated fusion the sublime refinement and finesse that are the of power and pleasure is advanced Lexus technology. The outstanding performance of the The LX expresses its SUV leadership with the V8 engine, 6-speed automatic transmission, and exceptionally strong chassis is harnessed by a human-focused approach to the integration of and 4WD capabilities to confidently tackle advanced technology. It assists driving operation tough off-road challenges also contribute to in demanding off-road conditions, and provides outstanding on-road comfort and driving ease. intuitive control and peace of mind to heighten

projects the LX's flagship status in a glance, the philosophy of L-finesse.

technologies aims to anticipate and satisfy road, is bolstered by seats designed to distribute human emotions, rather than require people pressure, to provide excellent hold while driving to adapt to the technology. The intuitive and over challenging terrain, and exquisite comfort natural operation of advanced driving, comfort in the city. and entertainment systems, is underpinned by

Complementing the exterior styling which the separation and consolidation of functionality into operation and display zones, and smooth cabin expresses the key concepts of 'powerful', integration of interaction using the Remote 'advanced' and 'luxurious' in its seamless blend Touch Interface. This human-oriented focus of refined features, contemporary technologies extends to the comfort and convenience of and peerless luxury. It is shaped by a human-passengers in the rear seats with the provision oriented focus that embodies the core of an independent entertainment system and independent climate control system.

The thoughtful integration of advanced Occupant comfort, both on-road and off-

DESIGN

The LX affirms its iconic flagship SUV status with a consummate blend of power, elegance and finesse.

the muscular design dynamically expresses the LX theme of 'muscular premium' through the key concepts of 'powerful', 'advanced', 'luxurious' and 'urban sophistication'. The solid through the signature Lexus spindle grille which is reinforced by solid inner bars. The eyecatching Lexus L-shaped illumination of the triple LED headlamps heightens the immediate identification of the LX as a Lexus. Its unique with a flowing roofline that exudes a feeling of movement, and around to the thin rear

In evolving the iconic flagship of Lexus SUVs, combination lamps with surface-emitting LEDs set high on the back door to express a feeling of width and power.

In the cabin, the feeling of power is expressed in the strong horizontal lines of the layout that athletic presence projects forward power enhance orientation while driving off-road. It is complemented by the beautiful craftsmanship, melding fine leather, rich wood trim, metallike ornamentation and deep piano black finish to exude a feeling of elegant refinement. The subtle white illumination of the instrumentation form leads the eye to a sharp side silhouette and cabin lighting further deepens the luxury

L X

OFF-ROAD TECHNOLOGY

The pinnacle of Lexus SUVs generates powerful off-road performance, boosting the pleasure of driving far from the

The platform for the LX's resilient off-road complemented by Turn Assist, which assists the challenging off-road adventures. Multi-terrain speeds. Select adjusts multiple vehicle systems to Loose Rock, Mogul, Rock & Dirt or Rock.

each wheel independently, enabling the driver to focus fully on steering. Crawl Control is

performance is built on the core strength making of tighter turns when there is limited and reliability of an exceptional chassis. It is space to maneuver, and VFC (Variable Flow enhanced by advanced technologies to assist Control), an advanced evolution of power driving control, boosting the pleasure of steering that enhances steering precision at low

To help avoid blind spots and give the driver a negotiate a range of conditions: Mud & Sand, near 360° view of terrain close to the vehicle, the Multi-terrain Monitor displays views from For demanding off-road conditions such as four cameras strategically positioned around boulders and ruts, 5-speed Crawl Control the vehicle. Shift into low range and 4-Wheel intelligently adjusts the torque and brakes on AHC (Active Height Control) automatically adjusts the vehicle height in various situations.

OFF-ROAD TECHNOLOGY

01/Multi-terrain Select

To enhance off-road performance, to suit the terrain and conditions, when Crawl Control is switched off, Multi-terrain Select adjusts multiple vehicle systems to optimize driving characteristics for different road conditions: Mud & Sand for soft slippery uphills; Loose Rock for shifting rock surfaces or slippery uphills; Mogul for very bumpy, mogul-like roads; Rock & Dirt for very bumpy roads with moguls or rocky roads; and Rock for very bumpy and rocky roads. When Crawl Control is engaged, Auto Mode automatically optimizes the A-TRC (Active Traction Control System) control when the accelerator is depressed deep for forceful driving power.

02 / Crawl Control

Crawl Control intelligently controls throttle and braking operation, allowing the driver to concentrate on steering operations at very low speeds in demanding off-road conditions, and to drive with ease on slippery road surfaces, and gravel or

03 / Turn Assist

When Crawl Control is engaged, Turn Assist enhances turning performance in response to the driver's operation of the steering wheel while maintaining a constant low speed, reducing the amount of turns required to complete a tight cornering maneuver.

06 / Multi-terrain Monitor

When driving at low speeds, four cameras strategically positioned in the front, sides and rear relay images to the Multi-terrain Monitor, providing a near 360° view of the area around the vehicle during on-road mode, together with a view under the angle the vehicle is tilted, and the front view rotation grasp the road conditions ahead.

04 / VFC (Variable Flow Control)

VFC controls the flow of steering fluid in response to vehicle speed, steering angle and engine rpm, and optimally changes the steering feel appropriate for the driving mode selected in drive mode select. When driving at low speeds off-road, it reduces steering effort and enhances steering precision.

07 / 4-Wheel AHC/AVS

4-Wheel AHC (Active Height Control) provides intelligent control of suspension technology to automatically adjust the ground clearance at each wheel. It continuously makes adjustments in response to the terrain, to help optimize vehicle vehicle during off-road mode with the transfer in L4. balance and control while driving off-road. With This helps the driver to spot rocks, ruts, crevices and easy access mode switched on, when the engine is sheer drops that would otherwise be obscured from turned off, the vehicle height automatically lowers view. During off-road driving, a tilt gauge shows the to make getting out easy. AVS (Adaptive Variable Suspension system) optimally controls the damping display rotates the view to help the driver intuitively force of the shock absorbers on all four wheels in response to driver input and road surface conditions, contributing to excellent ride comfort and handling.

05 / Drive mode select

Drive mode select provides integrated control of multiple systems to let you tune performance to suit your driving style. You can select and change between modes: Normal, Eco, Comfort, Sport S and Sport S+ Modes. In addition, Customize Mode enables drivers to set their preferred settings for the powertrain, chassis and air conditioning.

L X

PERFORMANCE

The LX delivers powerful on-road and off-road performance with the assured smoothness and control worthy of a Lexus flagship SUV.

To create the exceptional performance and equal composure and pleasure. It begins with the extensive use of high-tensile steel to resist the twisting forces of uneven terrain without compromising comfort and refinement.

Further contributing to the smooth and quiet ride that is a hallmark of Lexus quality, the frame is designed to separate the suspension from the bodyshell, helping to prevent noise and vibration from entering the cabin.

The 4.5-liter V8 generates the power and ride qualities demanded of a flagship luxury torque to confidently tackle the challenges SUV, development of the LX focused on of demanding terrain, and deliver it with a helping drivers to travel on- or off-road with smoothness that takes driving freeways and city streets in easy stride. The engine seamlessly an exceptionally strong chassis, made with combines with the super intelligent 6-speed automatic transmission to give dynamic, smooth gear changes. Advanced traction, braking and suspension systems further enhance the LX's off-road credentials, while providing the assured poise and control for a sophisticated and comfortable urban driving experience.

PERFORMANCE

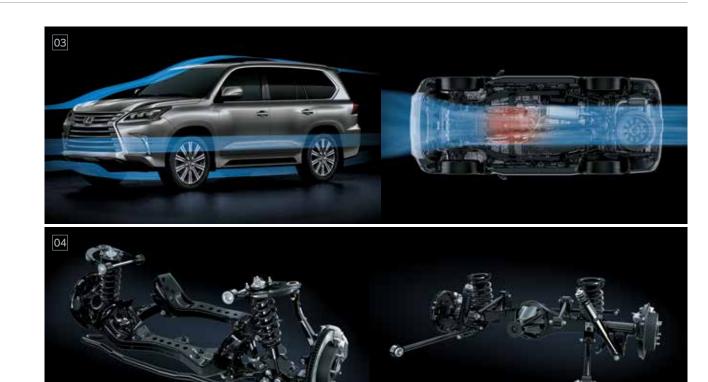

01/Chassis

The immense strength and outstanding rigidity essential to peerless off-road performance are the products of an exceptionally strong frame made with extensive use of high-tensile steel. In addition to outstanding off-road performance, it helps make the LX a robust and safe vehicle.

02 / 4.5-liter V8 engine/6 Speed AT (Automatic Transmission)

A V8 4.5-liter diesel engine offers both a heart-racing power performance along with a level of quietness equal to that of gasoline engines, and a low fuel consumption equivalent to that of 3-liter diesel engines.

03 / Aerodynamics

Various refinements including a large rear spoiler and aero stabilizing fins enhance aerodynamic performance, contributing to excellent straight-line stability and outstanding road holding.

04 / Front and rear suspension

The high-mount, double wishbone front suspension and 4-link rigid axle rear suspension contribute to the excellent handling, stability, and steering response, heightening driving pleasure. Optimizing the individual components including the coil springs, spring rate, and shock absorbers realizes luxurious ride comfort both on-road and off-road.

01/A-TRC (Active Traction Control System)

A-TRC helps enhance the ability to grip the road, especially when starting off or accelerating on uneven or slippery surfaces. Corrective measures are applied the moment the risk of wheelspin is detected, to help maintain traction.

02 / VSC (Vehicle Stability Control)

VSC helps prevent the loss of vehicle control, particularly when cornering quickly or at the onset of a skid. Selective application of the brakes and/or reducing power helps to enhance stability and reduce vehicle speed.

03 / Multi-terrain ABS with EBD

The Multi-terrain ABS (Anti-lock Brake System) senses driving conditions on dirt or sand, and optimizes ABS control for excellent stopping performance on different road surfaces. EBD (Electronic Brake force Distribution) helps to optimize the application of braking force to each wheel.

04 / Hill-start Assist Control

When starting off on a slope, Hill-start Assist Control automatically maintains brake pressure to help prevent the vehicle from slipping backwards. It works both on-road and offroad to help reduce driver fatigue.

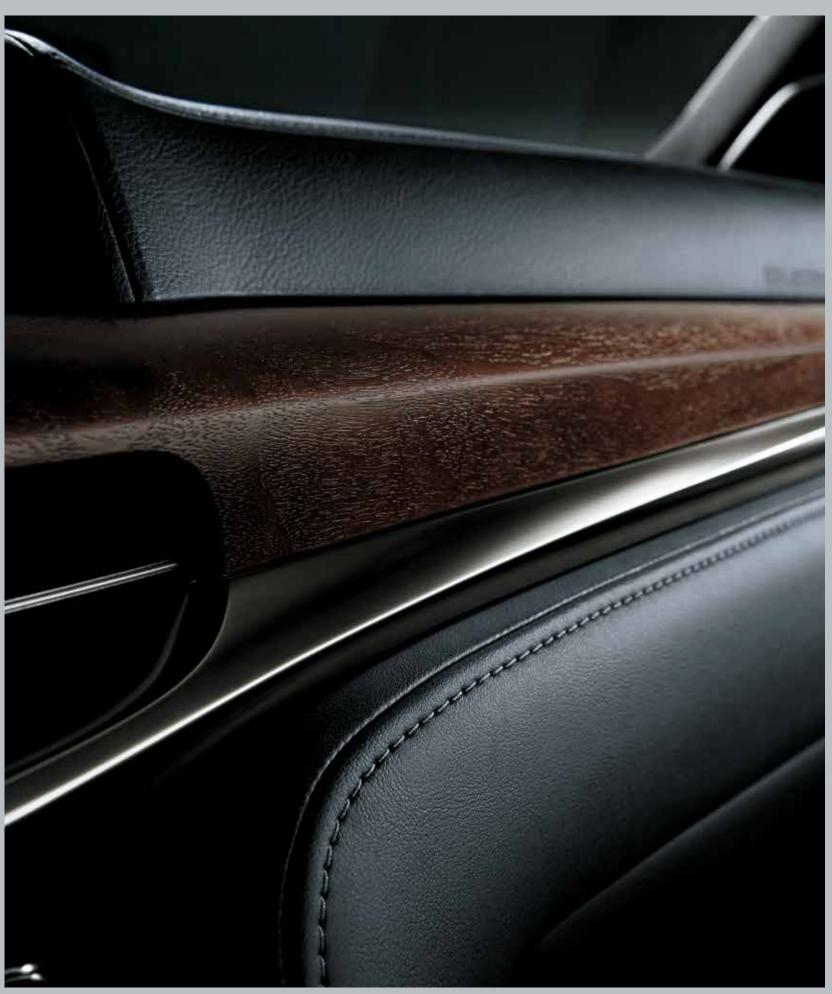

05 / VGRS (Variable Gear Ratio Steering)

VGRS optimally controls the steering gear ratio in response to vehicle speed and steering input, helping to realize excellent maneuverability and stability from low through to high speeds.

06 / Off-road specifications

A: Maximum safe angle (45 degrees)

- B: 1. Approach angle (25 degrees)
- 2. Ramp breakover angle (23 degrees)
- 3. Departure angle (20 degrees)
- C: 1. Fording depth (700mm)
- 2. Ground clearance (225mm)
- D: Vehicle turnover limit angle (44 degrees)
- E: Curb ride height (630mm)

FEATURES

The LX's urban sophistication shines through in the Lexus 'Spirit of Hospitality' and refined quality of individual details.

The finesse of the design, functionality and machine-stitched for precision and finished projector-type headlamps and rear combination lamps. Satisfaction grows as the LX welcomes you with LED foot area illumination and unlocks the doors when you extend a hand behind a door

in the spacious cabin, in the silky white LED lighting and ambient illumination integrated in the doors. Relaxation comes easily in the exceptional comfort of perforated leather seats,

quality finish of each individual feature by a Lexus master craftsman, and the Lexus reveals the peerless luxury that enhances the Climate Concierge that lets you customize LX ownership experience. It is immediately your individual temperature and comfort. recognizable as a Lexus in the distinctive State-of-the-art entertainment is provided signature spindle grille, L-shaped LED 3-eye by the Mark Levinson audio system and rear seat entertainment system with independent 11.6 inch displays.

Driving pleasure grows from a feeling of intuitive and responsive control, supported by the separation of operation and display zones, The Lexus 'Spirit of Hospitality' deepens thoughtful layout of switches, and integration of advanced technologies including the colour head-up display, Remote Touch Interface, and multimedia coordination function.

FEATURES / EXTERIOR

01/LED 3-eye projector-type headlamps

The next generation design of the distinctive 3-eye, energy-efficient LED lamps, which illuminate in a signature Lexus L-shape, flows seamlessly into the spindle grille to give the LX a bold fresh face.

The L-shape signature is heightened by the integrated surface-emitting LED DRL (Daytime Running Lamp), and LED turn signal lamps.

02 / LED front fog lamps

LED lamps integrated into the front bumper reduce power consumption while providing a bright beam, contributing to excellent visibility for safe driving in low light and at night.

03 / LED rear combination lamps

The Lexus signature is also seen in the thin L-shaped rear combination lamps, positioned high to complement the flowing design and enhance visibility for following vehicles. A sophisticated touch is surface-emitting LEDs in the tail and stop lamps, which appear to float when illuminated.

04/Moonroof

The electric tilt and slide glass moonroof lets the amount of fresh air and light you desire into the cabin. One-touch operation is quick and convenient, while a sunshade provides shade as required.

06 / Side steps

An example of Lexus hospitality is the thoughtful LED foot area illumination integrated in the bottom of the door mirrors and side steps to welcome and guide your steps as you get in the LX.

05 / Roof rails

The Lexus attention to form and function in every detail shows in the solid aluminum rails that are installed directly on the roof, enhancing the strength of the rails and at the same time smoothly integrating with the flow of the roofline.

07 / Door handles

The refined shape of the door handles is designed to make them easy to grip. For convenience, with the Electronic Key in your pocket or bag, simply touching the door handle locks and extending a hand behind the door handle unlocks the vehicle automatically.

01/Center console switches

The thoughtful layout of the center console shows the human-oriented focus of L-finesse. Driving-related switches including drive mode select, Crawl Control and VSC are grouped together within easy reach of the driver for intuitive and natural operation, clearly separated from the independent grouping of comfort-focused switches for the driver and front seat passenger. The layout of the switches and cupholders is optimized to enhance ease of use. Sophisticated details such as the metallic finish on control dials including for the audio system, and the use of white illumination for lettering on the switches that complements the subtle cabin lighting, deepen the feeling of luxury.

03 / Cool box

Located in the center console box, the ample storage capacity keeps items nicely cooled on hot days.

02 / EPB (Electric Parking Brake)

The EPB is activated and released using a switch in the center console. It also activates automatically when the shift lever is put in the P position, and releases when the shift lever is changed from P to other positions while depressing the brake pedal.

04 / Lexus Climate Concierge

The Lexus Climate Concierge concept realizes a humancentered approach to individual comfort for the occupants of the front and outboard second row seats. By simply pressing the Climate Concierge switch, the system coordinates with the 4-zone independent temperature controls to automatically control the cabin temperature, as well as the front and outboard second row seat heaters and ventilation that occupants come in direct contact with.

05 / Wireless charger

This thoughtful charging tray in the center cluster enables wireless charging of batteries in Qi-compatible smartphones and electronic devices simply by placing them on the charger tray.

07 / Analog clock

The elegant analog clock embodies Lexus luxury, functionality and simplicity. The solid metal feel of the ring is emphasized by the piano black dial. The surface light emitting 3-dimensional scales and precisely crafted hands provide excellent visibility. A GPS correction function helps check the clock always shows the correct local time.

06 / USB ports/mini-jack/power outlets

Two USB ports, a mini-jack and DC-12V power outlet in the center cluster, and a DC-12V power outlet in the back of the center console box, support the plug-and-play use of electronic devices. There is also an AC-220V power outlet in the side of the luggage space.

08 / Overhead console LED lamp switches

Refined hospitality extends to intuitive operation of the front LED dome lamp and LED map lamps in the overhead console. Touch switches that detect finger proximity turn the appropriate lamp on or off. The lamps emit a sophisticated silky white illumination.

FEATURES / INTERIOR

01 / Power back door

The back door features a split design that provides different loading options. For easy access especially when your hands are full, the upper section can be automatically opened or closed using the Electronic Key or a switch located on the instrument panel, and also closed using a switch in the upper section. The lower section opens manually.

$03 \, / \, Rear \, seat \, entertainment \, system$

The entertainment system for second row seat passengers features large high-definition 11.6 inch liquid crystal AI (Artificial Intelligence) displays that automatically optimize the display contrast. The displays can be tilted manually to adjust the individual viewing angle.

02 / Rear door window sunshades

Manual sunshades on the rear door windows give rear seat passengers convenient control over heat and light. Eliminating gaps between the shades and window trim helps to keep the sun from coming directly into the rear seats.

04 / Center armrest

The center armrest in the second row seats is designed to provide supportive comfort, together with additional storage space. It also features climate control switches in fingertip reach, allowing outboard seat passengers to customize settings for their individual comfort. A high contrast liquid crystal display provides clear readouts of settings.

05 / Rear seat entertainment system jacks

The back of the center console box incorporates mini- and HDMI jacks for the rear seat entertainment system, allowing the input of a wide range of content formats. Passengers can enjoy different content on the left and right displays, as well as individual audio volume control when using the two headphone jacks.

06 / Ambient illumination

Ambient illumination integrated into the trim of the front and rear doors provides a soft indirect light, heightening the feeling of sophistication in the cabin with a futuristic luxury touch.

FEATURES / INTERIOR

01/Multimedia coordination function

The LX's triple-linkage multimedia system supports the coordinated display of information on the large 12.3-inch EMV (Electro Multi-Vision) display in the center of the instrument panel, the 4.2-inch colour TFT (Thin Film Transistor) multi-information display in the meters, and a large color head-up display on the lower windshield glass. For convenience, audio system information, incoming mobile calls on the EMV display can also be displayed on the multi-information display, and controlled using switches on the steering wheel.

02 / Meters

The large analog Optitron tachometer and speedometer provide excellent visibility for reading vital information in a glance. The radial dial design, three-dimensional feel of the scale indicators, silver ornamentation of the scale rings and hairline finish of the outer rings exude premium quality.

03 / Remote touch interface

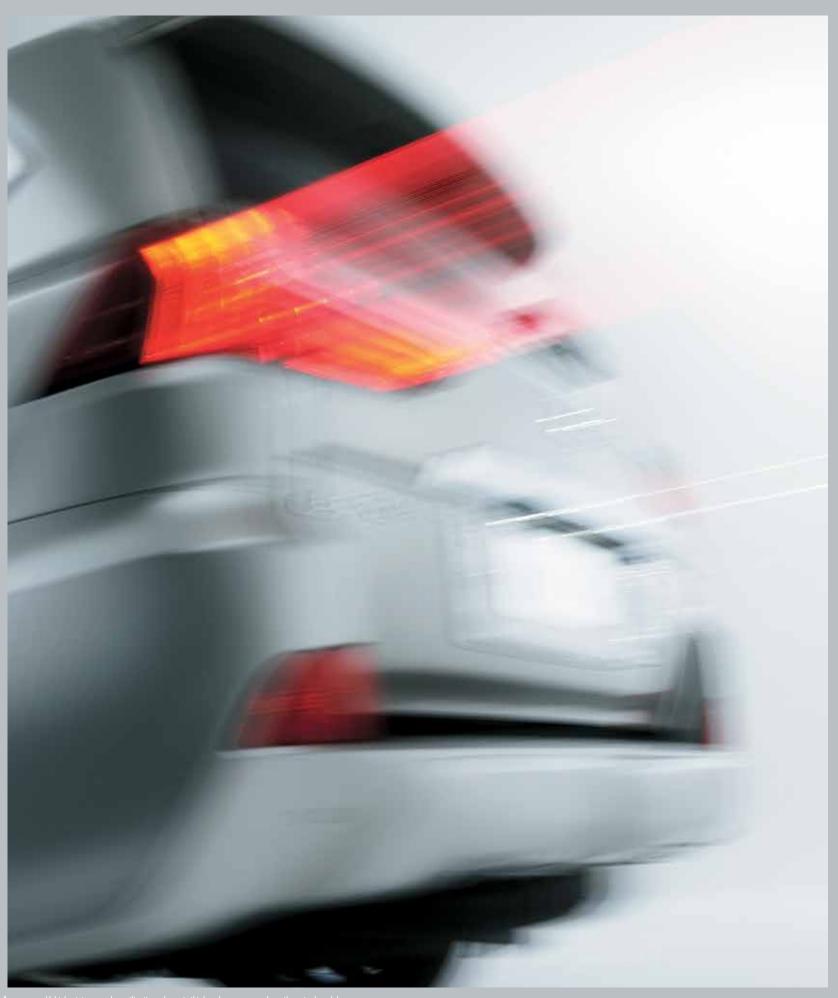

Simple operation that includes enter switches integrated on both sides and a back switch which lets users interact intuitively with the audio systems on the 12.3-inch EMV display.

05 / Mark Levinson audio system

The 19-speaker Mark Levinson Reference Surround Sound System delivers home-theater quality in-car entertainment. A 3-way speaker system in both the front and second row seats creates a 7.1-channel configuration that supports 5.1-channel playback, realizing a three-dimensional sound field with exceptional audio quality.

04 / Colour head-up display

The large color head-up display projects a range of frequently checked driving information and warnings on the lower windshield glass in the driver's line of sight, requiring only a movement of the eyes to see it.

LX

SAFETY

Because peace of mind is at heart of Lexus luxury, an advanced and comprehensive approach to safety forms the core of the LX's flagship SUV status.

To help drivers enjoy the pure driving prevent accidents. The LX comes equipped occupants in a collision. with LED wide angle cornering lamps and the Multi-terrain Monitor to provide additional checks of surroundings while parking.

In the event of an accident, occupant pleasure of the flagship Lexus SUV, the LX protection is integrated into the LX's core, takes a future-focused approach to help with the exceptionally strong frame and front assist confident and safe driving. It integrates sections of the body designed to absorb and coordinates operation of advanced and evenly distribute crash forces. Inside safety technologies to actively assist driving the cabin, ten SRS (Supplemental Restraint operation, to help avoid collisions and System) airbags help reduce the impact to

01/LED wide-angle cornering lamps

Compact, bright and energy-efficient, the LED wide-angle cornering lamps provide additional illumination in the direction of travel, to the side and above, enhancing pedestrian visibility when turning at intersections.

03/Cameras

For safe manoeuvres at low speed during off road as well as on road, four cameras are strategically positioned in the radiator grille, door mirrors and back door that provide a near 360° view of the area around the vehicle, together with a view under the vehicle.

02 / SRS airbags

The LX is fitted with ten SRS (Supplemental Restraint System) airbags: dual-stage SRS airbags (Front seats), SRS knee airbags (Front seats), SRS side airbags (Front and outboard second row seats), and SRS curtain shield airbags (Front door, rear door and rear quarter windows).*2

*¹ The SRS airbags are supplemental devices to be used with the seatbelts. The driver and all passengers in the vehicle must wear their seatbelts properly at all times. Never install a rear-facing CRS (Child Restraint System) on the front passenger's seat. For a forward-facing CRS, it is recommended you use it in the second row seats. Please do not use accessories for the seats which cover the parts where the SRS side airbags should inflate. Such accessories may prevent the SRS side airbags from activating correctly, causing serious injury (Lexus genuine seat covers are specifically designed for models equipped with the SRS side airbags. To find out about availability in your area, please inquire at your local dealer). The photo shows all the SRS airbags activated for display purposes only (the SRS side and curtain shield airbags only inflate on the side of the collision in an actual accident).

For details on these and other important safety features, be sure to read the Owner's Manual carefully.

LEXUS

TAKUMI

The Lexus pursuit of perfection finds its finest expression in the master craftsmanship of the Takumi.

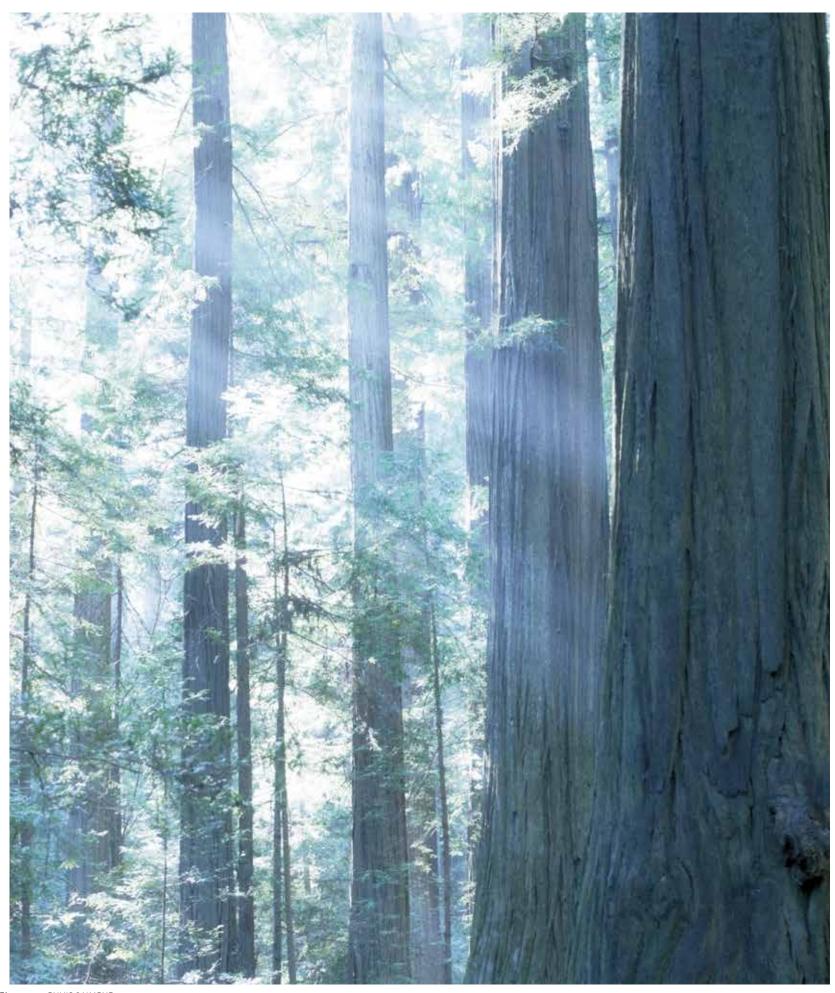

Every Lexus is based on an uncompromising approach to creating premium automobiles. Inspired by our 'Yet' philosophy, we seek innovation in every facet of engineering through a sophisticated fusion of seemingly incompatible ideas such as 'high performance yet high fuel efficiency'. In addition, unique Lexus styling is born of our L-finesse design language, a fine balance of 'Leading-edge' and 'finesse', which ensures every Lexus is not only captivating and luxurious, but also highly refined. Finally, every new Lexus model is also measured against a set of internal standards covering design, performance, specifications and

equipment, to ensure it is distinctive and worthy of the Lexus emblem.

This pursuit of perfection is evident at every stage of the manufacturing process. Every Lexus vehicle is created with a masterful skill and attention to detail inspired by both traditional artisanship and state-of-the-art engineering. For example, at the Tahara plant in Japan, precision components made using leading-edge digital technology are assembled and finished by master craftsmen called Takumi, whose technical expertise and sure senses are honed by decades of rigorous experience.
