

 LEXUS

LS

The LS has always appealed to customers who demand the best. They appreciate the highly refined and luxurious nature of the flagship. So, at the start of the LS development program, I had to consciously broaden my horizons, focusing on the finer things in life from the worlds of art, design and technology – a first step towards creating the most sophisticated LS yet to satisfy the world's most discerning customers.

**Hideki Watanabe,**  
LS Chief Engineer

## HEADLINING A LEGACY WITH THE PURSUIT OF PERFECTION

Luxury is about subtly capturing your attention, and not screaming out for it.

It's intricately woven into every part of the car, and not simply tacked on.

It is the spirit of pursuit, and the consciousness of perfection.

And what makes luxury great is that there are no limits for what it stands for. The standards of luxury are always being pushed, and constantly challenged.

Pushing your expectations is what drives us. And with the all-new LS, we are surpassing the limits of luxury, once again.

The new LS 460, LS 460 L, LS 600h L and all-new F SPORT do not sacrifice luxury for top-of-the-line performance, and none of the excitement of driving a powerful machine is relinquished in the interest of comfort.

The effortless blending of high performance, supreme comfort and practical utility is our definition of luxury. And we are proud to say that the new LS checks all the boxes.

## LUXURY IN EVERY SINGLE DETAIL

Forget all that you know about dashboards. The new LS features a human-oriented instrument panel that is designed with your comfort and utility in mind. The panel reflects this with a radical change to a more horizontally based layout that offers drivers a more comfortable, ergonomically ideal interaction with the vehicle's Human Machine Interface (HMI) system.

Every aspect of the driving position has been carefully considered to create the ideal placement of controls, maximize comfort, and minimize driver distraction and fatigue. To make it easier for you to access the controls, the switches have also been combined and their number reduced, while the center cluster has been made more compact. Not only is the redesigned instrument panel comfortable for you during long drives, it also helps you focus your attention on the road, making sure you are safe and sound.

## FULL CONTROL AT YOUR FINGERTIPS

The dashboard is divided into two distinct zones. The first is an upper Display Zone, with an ultra-wide 12.3-inch LCD multi-display screen located at an ideal distance for at-a-glance viewing. The second is the lower Operation Zone, which allows access to system controls such as the second-generation award-winning Remote Touch Interface (RTI).

The RTI is a mouse-operated controller that lets you manage the car's operations at your fingertips. This technology makes it possible for you to intuitively control the on-screen buttons and pointer with your fingertips, by providing feedback to your palm via a knob that creates the impression of operating buttons on the screen. Ergonomically positioned on the centre console, the RTI system lets you easily access a wealth of information even when driving at high speeds.

## A NEW DIMENSION IN STYLE AND COMFORT

What other cars do well, the new Lexus LS does brilliantly. And this is especially true when it comes to the quietness of the cabin. Comprehensive improvements have been made to the sound insulation of the LS, allowing it to surpass the exemplary standards of cabin quietness that have been established by other Lexus vehicles. Engine and road noise have been reduced through thicker insulation adopted on the front wheel arch liners, while road noise is eliminated through floor silencers and insulation materials under the rear seat. The wheels are of the noise-reducing type, preventing road friction from transforming into sound energy, even when driving on uneven roads. The result is a luxurious environment that is quiet enough for normal conversations even when the LS is moving at high speeds.

## ANOTHER PERSONAL BEST IN TOP-NOTCH COMFORT

The new LS is one of the most precise vehicles in the Lexus family, and with the comfort level to match.

The high body rigidity of the vehicle takes luxury up another notch. Not only is it fundamental to heightening vehicle stability and handling agility, the LS' high-rigidity body also plays a significant role in minimizing vibration from the engine bay and road surface into the cabin. This design consideration brings about a noticeable reduction in vibration, especially around the floor area at the driver's seat, leading to marked improvements in ride comfort.

As well, the front seats of the new LS have been improved with a new design that minimizes pressure peaks, improves support and reduces fatigue even on the longest road trips. The 20mm increase in cushion thickness of the seat base, together with a new Ottoman-style fold-out seat, also adds greater comfort by improving pelvic support and maintaining ideal posture.

## IT'S NOT JUST THE THROTTLE THAT WILL BE PUMPING

The new LS doesn't just challenge you to re-imagine the possibilities. It also single-handedly pushes the boundaries of engineering to deliver cutting-edge performance. This unparalleled sense of innovation has brought about a forward-thinking vehicle that flaunts the most intuitive and innovative of technologies, evident in its ride comfort and improved driving dynamics. Rigorously upgraded to combine refinement and high speed stability, the LS features improved body rigidity and enhanced aerodynamics to deliver a smoother road-hugging ride while the new Drive Mode Selector system lets you toggle between five driving modes to personalize and optimize your drive.

## PUTTING THE SMOOTHNESS BACK INTO THE DRIVE

Everything at its best. Effortless road acceleration, smooth handling, and the assuring feel of the brakes at your feet. It's the fundamental guarantee when you drive a Lexus LS. Each successive generation of the LS has established a reputation for class-leading aerodynamics. With a drag coefficient of just 0.26 in all configurations, the new LS stakes its claim as the most aerodynamically efficient car in its league.

The first generation LS was the first vehicle in the premium automotive segment to adopt a multi-link configuration to boost the front and rear air suspension system. With the new LS, this system has been refined to offer a more comfortable ride while reducing roll angles and improving initial response to steering inputs.

The new LS is also the only car in its category to feature an electro-hydraulic braking system. This not only contributes to a reduction in overall brake system weight, but also allows for more precise brake-force distribution. This means that you will enjoy superior braking response and effectiveness.

## LOOKS AS GOOD AS IT FEELS

While others are searching for the true meaning of absolute luxury, Lexus has already become the trendsetter in the world of subtle elegance. Luxury emanates throughout the interior of the LS. Exquisite stitched leather seating is found in all LS models. Genuine materials and finishes convey a contemporary premium look and feel, with a level of craftsmanship and attention to detail that introduces luxury through a modern, premium cabin atmosphere, while the highly durable material and highest quality stitching showcase the attention to detail of the vehicle's design.

## CONSIDER ALL THRILLS RAISED

The new LS is one vehicle that blurs the distinction between luxury sedans and powerful road machines. With its 4.6-Liter V8 engine, the new LS enjoys an exhilarating boost in power. It will stir your pulse and give you a rush of adrenaline as it goes from 0 to 100km/h in only 5.7 seconds, and 0 to 80km/h in just 4.9 seconds. The LS intensifies the feeling of driving, letting you experience every adrenaline rush while keeping you firmly in control.

A full-hybrid V8 powertrain has also been introduced on board the LS 600h L, combining a 5.0-Liter petrol engine with a powerful, high-output electric motor and a large-capacity battery pack that moves you from 0 to 100km/h in 6.1 seconds. That's why the new generation of LS hybrid driving wonders are also top performers of its time, delivering speeds and functionality that surpass its predecessors. With an unparalleled balance of performance and environmental efficiency, it lets you enjoy enhanced fuel economy along with the world's top-level engine performance in its league.

## LET INNOVATION TAKE THE WHEEL

The birth of the LS stemmed from a vision of creating a new world standard for luxury vehicles, with performance that not only exceeded expectations but also captured the imagination and minds of users. Living up to its commitment as one of the most precise and cutting-edge vehicles, the LS offers a host of new features and technologies that cements its position as a prestige sedan. Features such as the all-wheel drive system with a central, permanently engaged, Torsen<sup>®</sup> Limited Slip Differential (LSD) which effectively distributes power between the front and rear axles, lets the LS deliver the rear wheel drive characteristics of ride comfort and acceleration stability essential to a dynamic, premium sedan.

The new LS is also equipped with the latest Vehicle Dynamics Integrated Management (VDIM) system, which seamlessly anticipates difficult driving situations, making torque and braking corrections intuitively when needed.

And unique to the LS 600h L, the full-hybrid drive train's Driving Response and Acceleration Management System (DRAMS) also allows the VDIM to have unprecedented interaction with both engine and transmission, employing engine and electric motor output controls to deliver a faster and more precise response to situations.

## ENGINEERED TO TURN FUEL INTO ADRENALINE

For the first time in LS history, the F SPORT package is introduced on LS sedans, embodying the ultimate in sporty driving performance. The sporty styling of the LS F SPORT package radiates a sense of athleticism and sportiness, shaped by the bold lines of the front bumper and the iconic mesh in the distinctive spindle grille. The powerful stance of the 19-inch aluminum wheels, 6-piston Brembo front brake calipers and the F SPORT emblem on the front fender add to the car's distinctive race-car appearance. And with Sport air suspension that lowers the body height by 10mm, it is a driving experience that delivers on all fronts – head-turning looks, sporty design flair, and unprecedented performance.

## A TRUE SPORTS CAR INSIDE OUT

When you get behind the wheel of the LS F SPORT with its exclusive authentic sports seats, dimpled perforated leather steering wheel, exclusive trim and classy color scheme, you know you're in for an exhilarating performance that is unlike any other sedan. Depress the iconic aluminum sports pedals and relish the feeling of control over this machine. Toggle the paddle shift switches and enjoy the exhilarating experience of handling a sporty manual transmission. With its unparalleled focus on sporting performance, coupled with an exclusive Black and White Gray colour scheme, the LS F SPORT looks as distinctive as it is a performer.

*\* Vehicle, equipment and specifications pictured may vary from models available locally.*

## LIMITS ARE SET TO BE CHALLENGED

The new LS F SPORT doesn't just look and feel like a race car – it performs like one. Equipped with a torque-sensing, Torsen<sup>®</sup> Limited Slip Differential which optimally distributes torque between the rear wheels, the LS F SPORT enhances traction for faster acceleration. Features like the Active Stabilizer System also combine a flat ride posture and superior ride comfort with enhanced body control and steering response precision during high-performance driving. What's more – the LS F SPORT boasts an intake sound creator that uses a damper to amplify the vibration of the car to create a sense of sporty driving.

## COMPROMISING SAFETY IS NOT AN OPTION

At Lexus, providing you with the ideal safe driving experience is our constant goal. Compromising safety is never an option, and safety features are never dismissed as after-thoughts at Lexus. So much so that every single aspect of the safety features have been refined and redesigned to ensure that nothing gets in the way of your safety.

## OBSESSIVE PURSUIT OF ULTIMATE SAFETY

Passive safety functions help to protect you in the event of a crash. With two-stage Dual Supplemental Restraint System (SRS) front airbags including a twin-chamber passenger airbag, driver and front passenger airbags, front and rear side airbags, as well as full-length side curtain airbags, injury will be largely minimized. And, in the event of a rear-end collision, the LS activates the Pre-crash Seatbelt (PSB) by pretensioning the seatbelts to restrain the passenger.

# FEATURES

Lexus Hybrid Drive  
*\*Only available in LS 600h L*

Adaptive High-beam System (AHS)

Remote Touch Controller

12.3-inch LED Multimedia Display

19-speaker Mark Levinson®  
*\*Not applicable for LS 460*

Dynamic LED Interior Illumination

Blind Spot Monitor (BSM) & Rear Cross Traffic Alert (RCTA)

Climate Concierge

NanoE Technology

The LS differs from other vehicles in that it is built for customers who possess a more highly critical eye. This includes a keen sense of beauty and quality as nurtured through their life experiences. As such, they demand the best. Our target customers are precisely those who are familiar with the real thing, so are capable of casting a critical eye on products they consider buying. This is the first step towards refining the new LS and creating a further sophisticated product.

LS Chief Engineer

# OWNING A LEXUS IS A JOURNEY IN ITSELF, ONE THAT IS JUDGED NOT BY MILEAGE BUT BY THE COUNTLESS PRICELESS MOMENTS.

BEGIN YOUR JOURNEY THE RIGHT WAY WITH QUALITY SERVICES DESIGNED TO ENHANCE YOUR LEXUS EXPERIENCE.

## LEXUS | CAPITAL SERVICES

LEXUS believes that perfection lies in the details. When you purchase a LEXUS, you will experience service like no other. LEXUS CAPITAL offers you flexible financial services that enable you to be in full control of your finances, as always. Applying for financing can be handled quickly and conveniently at all LEXUS showrooms.

## LEXUS | INSURANCE

LEXUS INSURANCE is a comprehensive motor insurance packaged by LEXUS to provide LEXUS owners with tailored insurance coverage for damages to the owner's vehicle as well as any liabilities incurred by the third party.

## LEXUS | ASSIST

LEXUS ASSIST is a 24-hour roadside assistance service provided by LEXUS. You can be assured of reliable assistance via this exclusive program aimed at creating a hassle-free driving experience.

## LEXUS | ACCESS

LEXUS ACCESS is a comprehensive vehicle leasing program designed to bring you even closer to driving a LEXUS. Complementing our Flexi Plan and Islamic Financing Plan, LEXUS ACCESS offers you yet another option to experience the perfection embodied by a LEXUS.

Note:
